

**PA Change Orders**  
**Implemented**  
**PAS Release 4/4/05**

The following PA Change Orders have been implemented in PAS as of April 4, 2005:

1. Change Order # 27 "Extending the Forecast Report"
2. Change Order # 30 "LERG Assignee Confirmation of Activation in PSTN for Industry Inventory Pool" (INC Issue 423)
3. Change Order # 31 "Expand Query Options for Donation Report"
4. Change Order # 32 "Modify Process for Deleting PAS Work Items"
5. Change Order # 33 "Modify Search Forms/View Form Query"
6. Change Order # 36 "Red Light Rule System Modification"

The following changes have been made in PAS as a result of the PA Change Orders:

- Change Order # 27: The "Forecast Reports" (*located under the "Reports" section in PAS*) has been expanded from showing twelve months of forecasted data to now showing eighteen months of forecasted data.
- Change Order # 30: Internal changes were made to support the resolution of INC Issue 423. The "Block Report" (*which can be found under "Reports" located on the homepage of [www.nationalpooling.com](http://www.nationalpooling.com)*), will highlight those available blocks in **RED** that are pending verification of activation in the PSTN from the LERG assignee. In addition, on the Block available date, an email notification will be sent to the service provider requesting verification that the code is active in the PSTN, loaded in the NPAC and that all other LERG responsibilities have been fulfilled. Follow-up notices will be sent every 10 calendar days until a positive verification response is received back or until the code is reclaimed.
- Change Order # 31: The query options for the "Donation Reports" (*located under the "Reports" section in PAS*) has been expanded to allow service providers to query the report by "NPA" and/or by "OCN" and to sort the report by "Rate Center" or by "OCN".
- Change Order # 32: On the "Work Item Summary" screen (located on the home page in PAS), a new capability has been added for service providers only, which allows them to delete "all" of their work items at once or they can individually select which work items to delete.

- Change Order # 33: On the "View Forms" screen (*located under the "Search Forms"/"View Form" section in PAS*), when a user enters a block (NPA-NXX-X), PAS will only retrieve the forms that are associated to the specified block.

Change Order # 36: Internal changes were made to support the FCC Red Light Rule.
