California Reaffirms NeuStar As Pooling Administrator for Six Additional Area Codes

Washington, D.C. (February 22, 2001) – Clearinghouse services

provider NeuStar, Inc. announced that it has been reaffirmed by the California Public Utilities Commission as the interim pooling administrator for six more of the state's mandatory thousands-block number pooling trials in the 408, 650, 510, 619, 562, and 858 area codes. The expected implementation dates for the pooling trials are May 12, June 8, June 29, October 27, November 24, and December 29 of this year, respectively.

California is already conducting pooling trials in the 310, 714, 818 and 909 area codes in southern California, and the 415 area code in the northern portion of the state, all under the administration of NeuStar.

Number pooling is the technology that allows phone numbers to be assigned in blocks of 1,000, instead of the telephone network-mandated structure of 10,000 number blocks, which has been in place since 1947. Pooling provides efficient management of numbering resources and proves to extend the life of area codes.

“NeuStar looks forward to continued work with the California Public Utilities Commission to administer number pooling trials throughout the state,” said Barry Bishop, Director of Numbering Services for NeuStar. “We have conducted pooling trials since 1998, for more than a dozen states and in over 47 area codes now. We are extremely pleased with the efficient conservation that thousand block pooling provides.”

NeuStar is also conducting number pooling trials in the following states (see chart below, which includes California). Some trials are underway, while others are expected to start later this year.

STATES	AREA CODES UNDERGOING POOLING TRIALS	POOLING TRIALS EXPECTED IN 2001
California	310, 415, 714 and 909	818, 408, 650, 510, 619, 562, and 858
Colorado		303 and 720
Connecticut	860	203
Florida	954 and 561	904
Illinois	708, 847, 630, 312, and 773	
Maine	207	
Nebraska		402
New Hampshire	603	
New York	212, 516, 518, 718, 716 and 315	914, 845, 646, 347, 607, 631 and 917
Oregon		541, 503/971
Pennsylvania		610 /484
Texas	512	
Utah		801/385

NeuStar serves the entire telecommunications industry as a key partner in its neutral, third party role as the North American Numbering Plan Administrator (NANPA) and manages the Number Portability Administration Center (NPAC) for Local Number Portability (LNP).

As the NANPA, NeuStar assigns area codes, central office codes, and other numbering resources, and coordinates the development of industry plans for the introduction of new area codes, in the United States and its territories.

As the LNP Administrator, NeuStar manages the database that is a critical component for the routing of all telephone calls in North America. Hundreds of telecommunications carriers in the United States and Canada connect to NeuStar's NPAC in Chicago. There, advanced LNP technology enables customers to keep their same phone numbers if they switch local telephone service providers. The LNP system also conserves numbers and facilitates competition within the industry.

NeuStar, based in Washington, D.C., is committed to administering high-quality, evenhanded and competitively neutral services to the communications industry. Visit NeuStar's web sites at www.neustar.com, www.nanpa.com, www.npac.com and www.numberpool.com.
